LINKSHADOW®

Industry

LARGEST GOVERNMENT AUTHORITY

EMPLOYEES - 1000+

CASE STUDY

One of the largest government authorities in the region partnered with LinkShadow to enhance their IT environment and ensure compliance with international frameworks in terms of threat detection and mitigation.

CHALLENGES

- Visibility: Network, Users & Assets Activities visibility

- Reporting: CXO visibility and reporting

- Inability to monitor, detect and respond to cyber threats

- Unable to safeguard sensitive information such as customer data, financial information, and intellectual property

- Insider threats can be particularly challenging for government organisations where employees have access to sensitive information and system and the entity needed to implement monitoring and access controls to detect and prevent insider threats

SOLUTION & BENEFITS

LinkShadow Analytics Platform helped enhance the overall cybersecurity status and helped overcome most of the major challenges in terms of Network visibility, Users Visibility, Assets Visibility they were facing:

- Provided with comprehensive visibility over the entire network, connection and communications, users and assets as well, which enabled them to link all the dots together while investigating threats.

- Provided the CXO a real-time compilation of the overall security status through various dashboards and widgets that is shared with the related managers on a scheduled time and date.

- Provided with advanced threat detection capabilities to identify potential threats and vulnerabilities across the organization's networks, systems, and applications. It also helped monitor suspicious behaviour and anomalies, detect and alert on targeted attacks, and identify advanced threats like malware and ransomware.

- Helped monitor any suspicious activity by employees and assets, helping the entity identify and prevent insider threats.

  In summary, an overall comprehensive visibility was achieved by implementing LinkShadow Analytics Platform to enhance threat detection, prioritization, investigation capabilities, response and mitigation.

CUSTOMER FEEDBACK

"Implementing LinkShadow Analytics Platform simply provided us with comprehensive visibility over the network, Connections & communications, User and asset as well - connecting all dots to the cyberattacks, starting from the visibility, analytics, detections, prioritizing, investigation capabilities and response."
