EXPERIENCE VR-ENABLED THREAT HUNTING

Detect Cyber and Insider Threats

www.linkshadow.com
LINKSHADOW, NEXT-GENERATION CYBERSECURITY ANALYTICS.

Designed to manage threats in real-time with attacker behavioral analysis, LinkShadow is meant for organizations that are looking to enhance their defenses against advanced cyberattacks, zero-day malware and ransomware, while simultaneously gaining rapid insight into the effectiveness of their existing security investments.
LS Insight

In tandem with LinkShadow, LS Insight significantly enhances the visibility of the entire organization's assets. With this lightweight agent, SOC Analysts obtain in-depth forensic data about processes, details of the applications installed and much more. It empowers LinkShadow to provide additional security features such as User Activity Monitoring, File Integrity Monitoring, Registry Integrity Monitoring and Automated Response functionality.
